Engineering and Design
SEDIMENTATION INVESTIGATIONS OF RIVERS AND RESERVOIRS

Table of Contents

	<u>Subject</u>	<u>Paragraph</u>	<u>Page</u>
CHAPTER 1.	INTRODUCTION		
Section I.	General		
	Purpose.....	1-1	1-1
	Scope.....	1-2	1-1
	Need for Sediment Investigation.....	1-3	1-2
	Physical Processes.....	1-3a	1-2
	Impact of Sediment on Projects.....	1-3b	1-2
	Impact of Project on Stream System Morphology.....	1-3c	1-2
	Project Formulation.....	1-4	1-2
	Level of Detail for Sediment Investigation.....	1-5	1-2
	Staged Sedimentation Studies.....	1-6	1-3
	General.....	1-6a	1-3
	Stage 1. Sediment Impact Assessmen.....	1-6b	1-4
	Stage 2. Detailed Sedimentation Study.....	1-6c	1-4
	Stage 3. Feature Design Sedimentation Study.....	1-6d	1-4
	Risks and Consequences.....	1-6e	1-4
Section II.	Reporting Requirements		
	General.....	1-7	1-5
	Feasibility Report.....	1-8	1-5
	Reconnaissance Phase.....	1-8a	1-5
	Feasibility Phase.....	1-8b	1-6
	Design Memorandum.....	1-9	1-6
	Analytical Techniques.....	1-9a	1-6
	Real Estate Requirements.....	1-9b	1-6
	Reporting Requirements.....	1-9c	1-6
	Post-Construction Reports.....	1-10	1-6
	Continuing Authority Studies.....	1-11	1-7
	Initial Reconnaissance.....	1-11a	1-7
	Expanded Reconnaissance.....	1-11b	1-7
	Detailed Project Report.....	1-11c	1-7
	Sedimentation Reports.....	1-12	1-7

	Subject	Paragraph	Page
CHAPTER 2. FORMULATION AND PLANNING OF SEDIMENT STUDIES			
Section I.	Introduction		
	General.....	2-1	2-1
	Likelihood of Having Sediment Problem.....	2-2	2-1
	Stable Channel Historically.....	2-2a	2-1
	Unstable Channel Historically.....	2-1b	2-1
	Categories of Sedimentation Problems.....	2-3	2-1
	Identification of Potential Problem Areas.....	2-4	2-1
Section II.	The Sediment Studies Work Plan		
	Purpose for the Sediment Studies Work Plan(SSWP).....	2-5	2-2
	Usage.....	2-6	2-2
	Contents of Sediment Studies Work Plan.....	2-7	2-3
	Problem Identification.....	2-7a	2-3
	Approach.....	2-7b	2-3
	Time and Cost Estimate.....	2-7c	2-3
	Schedule.....	2-7d	2-3
	End Products.....	2-7e	2-3
	Data Collection.....	2-7f	2-3
	Level of Detail to be Included in the SSWP.....	2-8	2-3
	Sequence of Tasks in Developing the SSWP.....	2-9	2-3
	Boundary of Study Area.....	2-9a	2-3
	Objective.....	2-9b	2-3
	Problem Identification.....	2-9c	2-4
	Data Inventory.....	2-9d	2-4
	Recommended Approaches.....	2-9e	2-4
	Time and Cost Estimate.....	2-9f	2-4
	Review.....	2-9g	2-4
	Data Sources.....	2-10	2-5
	General.....	2-10a	2-5
	U. S. Geological Survey (USGS).....	2-10b	2-5
	National Weather Service (NWS).....	2-10c	2-5
	Soil Conservation Service (SCS).....	2-10d	2-5
	Agricultural Stabilization & Conservation Service (ASCS).....	2-10e	2-5
	Corps of Engineers.....	2-10f	2-5
	State Agencies.....	2-10g	2-6
	Local Agencies, Businesses and Residents.....	2-10h	2-6
CHAPTER 3. SEDIMENT YIELD			
Section I.	Introduction		
	Purpose and Scope.....	3-1	3-1
	Need for Sediment Yield Studies.....	3-2	3-1
	Reservoirs.....	3-2a	3-1
	Local Flood Protection Channel Projects.....	3-2b	3-2

	Subject	Paragraph	Page
	Channel Projects for Navigation.....	3-2c	3-2
	Alternate Future Land Use Studies.....	3-2d	3-2
	Field Reconnaissance.....	3-3	3-2
	Methods for Determining Sediment Yield.....	3-4	3-3
Section II.	Sediment Yield Methods Based on Direct Measurements		
	Introduction.....	3-5	3-3
	In-stream Sampling.....	3-6	3-3
	Published Long-Term Daily Discharge Records.....	3-6a	3-3
	Period Yield Sediment Load Accumulation.....	3-6b	3-4
	Flow-Duration Sediment-Discharge Rating Curve Method.....	3-6c	3-4
	Flood Water Sampling.....	3-6d	3-10
	Reservoir Sedimentation Investigations.....	3-7	3-11
	Trap Efficiency.....	3-7a	3-12
	Sediment Size.....	3-7b	3-13
	Settling Velocity of Sediment Particles.....	3-7c	3-14
	Consolidation of Deposition.....	3-7d	3-14
	Contributing Drainage Area.....	3-7e	3-14
	Erosion Mechanism.....	3-7f	3-14
	Transfer of In-Stream Data.....	3-8	3-14
	Transfer of Reservoir Deposition Data.....	3-9	3-14
	Regional Analysis.....	3-10	3-15
	Dendy and Bolton Method.....	3-10a	3-15
	Pacific Southwest Interagency Committee (PSIAC) Method.....	3-10b	3-16
	Tatum Method for Southern California.....	3-10c	3-16
	Transportation Research Board Method.....	3-10d	3-16
	Other Regional Studies.....	3-10e	3-16
	Basin Specific Regionalization.....	3-10f	3-17
Section III.	Mathematical Methods for Calculating Sediment Yield		
	General.....	3-11	3-17
	Sediment Transport Functions.....	3-12	3-17
	Universal Soil Loss Equation (USLE).....	3-13	3-18
	Calculations.....	3-13a	3-18
	Points of Caution When Using the USLE.....	3-13b	3-18
	Sediment Delivery Ratio.....	3-14	3-19
	Modified Universal Soil Loss Equation (MUSLE).....	3-15	3-19
	Runoff.....	3-15a	3-21
	Confirmation.....	3-15b	3-21
	Gully and Stream Bank Erosion.....	3-16	3-21
	Stream Bank Erosion.....	3-16a	3-21
	Gully Erosion.....	3-16b	3-22
	Future Conditions.....	3-16c	3-22
	Computer Models of Watershed Sedimentation.....	3-17	3-22

	<u>Subject</u>	<u>Paragraph</u>	<u>Page</u>
Section IV.	Urban Sediment Yield		
	Urban Sediment Yield.....	3-18	3-22
	Urban Yield Methods.....	3-19	3-23
	Adjustment Factors for Urbanization.....	3-20	3-23
Section V.	Report Requirements		
	Topics to Report.....	3-21	3-26
CHAPTER 4.	RIVER SEDIMENTATION		
Section I.	Introduction		
	Purpose.....	4-1	4-1
	Scope.....	4-2	4-1
	Philosophy of the Sedimentation Investigation.....	4-3	4-1
Section II.	Evaluation of the No-Action Condition		
	Regime of the Natural River.....	4-4	4-1
	Stream Characteristics.....	4-4a	4-2
	Natural Changes.....	4-4b	4-2
	Natural Forces.....	4-4c	4-2
	Dependent Variables.....	4-4d	4-2
	System Behavior.....	4-4e	4-2
	Symptoms of Channel Instability in the Project Area....	4-5	4-3
	Natural Sedimentation Processes.....	4-6	4-3
	Bank Caving.....	4-7	4-4
	Erosion Mechanism.....	4-7a	4-4
	Erosion Rates and Quantities.....	4-7b	4-5
	Destination of Bank Sediment.....	4-7c	4-5
	Field Reconnaissance.....	4-7d	4-5
	Channel Bed Scour and Deposition.....	4-8	4-6
	Scour.....	4-8a	4-6
	Deposition.....	4-8b	4-7
	Field Reconnaissance.....	4-8c	4-7
	Methods for Calculating Channel Bed Scour and Deposition.....	4-9	4-8
	General Scour and Deposition.....	4-9a	4-8
	Head-cuts.....	4-9b	4-8
	Scour at Bridges.....	4-9c	4-8
	Design Features to Arrest Bank Erosion.....	4-10	4-8
	Direct Protection.....	4-10a	4-8
	Indirect Protection.....	4-10b	4-8
	Grade Control.....	4-10c	4-9
	Section 32 Program.....	4-10d	4-9
	Design Features to Control Aggradation.....	4-11	4-9
	Debris Basins.....	4-11a	4-9
	Maintenance Dredging.....	4-11b	4-9
	Design Features to Control Degradation.....	4-12	4-9
	Drop Structure.....	4-12a	4-9

Subject	Paragraph	Page
Low Weirs.....	4-12b	4-10
Section III. Flood Protection Channel Projects		
Sedimentation Problems Associated with Flood Protection Channels.....	4-13	4-10
Key Locations.....	4-14	4-11
Maintenance Requirements.....	4-15	4-11
Maintenance of Organic Debris and Vegetation Control.....	4-15a	4-11
Maintenance to Remove Deposits from Aggrading Channels.....	4-15b	4-12
Maintenance to Prevent Channel Deterioration Due to Degradation.....	4-15c	4-12
Maintenance to Overbank Areas.....	4-15d	4-12
Maintenance to Tributaries.....	4-15e	4-12
Determining the Boundary of the Study Area.....	4-16	4-13
Design Features to Reduce Flooding.....	4-17	4-13
Levees and Flood Walls.....	4-17a	4-14
Reduced Hydraulic Roughness.....	4-17b	4-14
Channelization-Natural Boundaries.....	4-17c	4-15
Channelization-Rigid Boundaries.....	4-17d	4-17
Cutoffs.....	4-17e	4-14
Diversions.....	4-17f	4-14
Pump Plants.....	4-17g	4-21
Reservoirs.....	4-17h	4-21
Debris Basins.....	4-17i	4-21
Section IV. Navigation Channel Projects		
Sedimentation Problems Associated with Navigation Channels.....	4-18	4-21
Key Locations.....	4-19	4-22
Maintenance Requirements.....	4-20	4-22
Long Term Maintenance.....	4-20a	4-22
Design Event Maintenance.....	4-20b	4-22
Tributary Channel Deterioration Due to Navigation		
Channel Dredging.....	4-20c	4-22
Determining the Boundary of the Study Area.....	4-21	4-23
Data Requirements.....	4-21a	4-23
Sensitivity of Adjacent Channel.....	4-21b	4-23
Approach and Exit Channels.....	4-21c	4-23
Methods of Analysis.....	4-22	4-23
Design Features for Navigation Channel.....	4-23	4-23
Navigation Channel Alignment in Stable Reaches.....	4-23a	4-23
Stabilizing or Modifying the Channel Plan-form.....	4-23b	4-25
Cutoffs.....	4-23c	4-25
Chute Closure.....	4-23d	4-25
Dredging.....	4-23e	4-25

	Subject	Paragraph	Page
Section V.	Channel Mining		
	Channel Mining.....	4-24	4-25
	Allowable Quantities and Rates of Removal.....	4-25	4-25
	Impact of Mining on the Stream System.....	4-26	4-25
	Upstream.....	4-26a	4-25
	Downstream.....	4-26b	4-26
Section VI.	Staged Sedimentation Studies		
	Staged Sedimentation Studies.....	4-27	4-26
	Available Study Approaches.....	4-28	4-26
	Sediment Impact Assessment.....	4-29	4-26
	General.....	4-29a	4-26
	Sequence of Steps.....	4-29b	4-28
	Points of Interest if Performing a Sediment Impact Assessment.....	4-29c	4-31
	Detailed Sedimentation Study.....	4-30	4-31
	Field Reconnaissance.....	4-30a	4-32
	Data Collection.....	4-30b	4-32
	Selection of Transport Equation.....	4-30c	4-32
	Preparing Data for the Numerical Model.....	4-30d	4-32
	Confirmation.....	4-30e	4-32
	Prediction.....	4-30f	4-32
	Conclusions.....	4-30g	4-32
	Feature Design Sedimentation Study.....	4-31	4-32
	Field Reconnaissance.....	4-31a	4-33
	Confirmation.....	4-31b	4-33
	Prediction.....	4-31c	4-33
CHAPTER 5.	RESERVOIR SEDIMENTATION		
Section I.	Introduction		
	Purpose.....	5-1	5-1
	Scope.....	5-2	5-1
	Philosophy of the Sedimentation Investigation.....	5-3	5-1
	System Response to Catastrophic Events.....	5-3a	5-1
	System Response to Normal Events.....	5-3b	5-2
Section II.	Evaluation of the No-Action Condition		
	Indicators of Change in the Stream System.....	5-4	5-2
Section III.	Evaluation of Modified Conditions		
	Points of Caution.....	5-5	5-2
	Fallacies.....	5-5a	5-2
	Topset Slope.....	5-5b	5-3
	Impact of Increased Stages Beyond Reservoir Limits.....	5-5c	5-3

	<u>Subject</u>	<u>Paragraph</u>	<u>Page</u>
	Sedimentation Problems Associated with Reservoirs.....	5-6	5-4
	Impact of a Reservoir Project on Stream System Morphology.....	5-7	5-4
	Volume of Deposition.....	5-8	5-5
	Location of Deposits.....	5-9	5-5
	Rise in water Surface Elevation.....	5-10	5-6
	Shallow Reservoirs.....	5-10a	5-6
	Deep Reservoirs.....	5-10b	5-6
	Phreatophytes.....	5-10c	5-6
	Aesthetics of Deposited Sediment.....	5-11	5-6
	Turbidity.....	5-12	5-6
	Density Current.....	5-13	5-6
	Water Quality Aspects of Sedimentation.....	5-14	5-7
	Shoreline Erosion.....	5-15	5-7
	Shifting Location of Channels.....	5-16	5-7
	Downstream Degradation.....	5-17	5-7
	Changes in Downstream Channel Capacity.....	5-18	5-8
	Local Scour at the Dam, Spillway and Stilling Basin.....	5-19	5-8
Section IV.	Levels of Sedimentation Studies and Methods of Analysis		
	Staged Sedimentation Investigations.....	5-20	5-9
	Sediment Impact Assessment.....	5-21	5-9
	Scope.....	5-22	5-10
	Approach.....	5-23	5-10
	Topics to Report.....	5-24	5-10
	Basic Background Information.....	5-24a	5-10
	Results of the River Morphology Study.....	5-24b	5-11
	Analysis of Reservoir and Watershed Parameters.....	5-24c	5-11
	Analysis Downstream from the Dam.....	5-24d	5-12
	Detailed Reservoir Sedimentation Study.....	5-25	5-12
	Scope.....	5-26	5-12
	Method of Analysis.....	5-27	5-12
	Approach.....	5-28	5-12
	Shallow Impoundments.....	5-28a	5-13
	Deep Impoundments.....	5-28b	5-13
	Topics to Report.....	5-29	5-13
	Basic Background Information.....	5-29a	5-13
	Analysis Upstream from the Dam.....	5-29b	5-13
	Analysis Downstream from the Dam.....	5-29c	5-15
Section V.	Reservoir Sedimentation Investigation Program		
	Reservoir Sedimentation Investigation Program....	5-30	5-15

	Subject	Paragraph	Page
Section VI.	Debris Basin Design		
	Debris Basins.....	5-31	5-16
	Design Considerations.....	5-32	5-16
	Design Guidelines.....	5-32a	5-16
	Safety.....	5-32b	5-17
	Location.....	5-32c	5-17
	Basin Size.....	5-32d	5-17
	Topset Slope.....	5-32e	5-17
	Sediment Yield.....	5-32f	5-17
	Analysis by Particle Size Class.....	5-32g	5-17
	Single Event Sediment Concentrations.....	5-32h	5-17
	Sediment Discharge Curve Extrapolation.....	5-32i	5-17
	Staged Design Studies.....	5-32j	5-17
	Embankment Height.....	5-32k	5-18
	Design Method.....	5-33	5-18
	Defining the Geometry.....	5-33a	5-18
	Conveyance Limits.....	5-33b	5-18
	Longitudinal Profile.....	5-33c	5-18
	Lateral Shape of Deposits.....	5-33d	5-18
	Sorting by Particle Size.....	5-33e	5-18
	Channel Regime.....	5-33f	5-18

CHAPTER 6. MODEL STUDIES

General.....	6-1	6-1
Undistorted Physical Model.....	6-2	6-1
Model Scales.....	6-3	6-1
Distorted Physical Models.....	6-4	6-2
Numerical Models.....	6-5	6-3
Calibration.....	6-6	6-3
Prediction.....	6-7	6-4
Interpretation of Results.....	6-8	6-4
Scour and Deposition in Rivers and Reservoirs (HEC-6).....	6-9	6-4
Open Channel Flow and Sedimentation (TABS-2).....	6-10	6-4
CORPS.....	6-11	6-5
Scope.....	6-11a	6-5
Access.....	6-11b	6-5
Documentation.....	6-11c	6-5
The sediment group.....	6-11d	6-5
Category "A.".....	6-11e	6-6

Table of Contents

Subject	Paragraph	Page	Subject	Paragraph	Page
Chapter 7 Sediment Properties			<i>Section VI</i> <i>References for Chapter 7</i>		7-8
<i>Section I</i> <i>General</i>			Chapter 8 Sediment Measurement Techniques		
Purpose	7-1	7-1	<i>Section I</i> <i>Sediment Measurement Equipment</i>		
Property Categories	7-2	7-1	General	8-1	8-1
<i>Section II</i> <i>Particles</i>			Federal Interagency		
General	7-3	7-1	Sedimentation Project	8-2	8-1
Particle Size	7-4	7-1	Characteristics of Ideal		
Particle Shape	7-5	7-1	Sediment Sampler	8-3	8-1
Particle Specific Gravity	7-6	7-2	Standardized Equipment	8-4	8-1
Particle Fall Velocity	7-7	7-3	Depth-Integrating Samplers	8-5	8-2
Methods for Obtaining Particle Size	7-8	7-3	Point-Integrating Samplers	8-6	8-2
Cohesiveness	7-9	7-4	Auxiliary or Automatic		
<i>Section III</i> <i>Sediment Mixtures</i>			Sampling Equipment	8-7	8-2
Gradation Curves	7-10	7-4	Bed Samplers	8-8	8-3
<i>Section IV</i> <i>Sediment Deposits</i>			Bed-Load Samplers	8-9	8-4
General	7-11	7-4	<i>Section II</i> <i>Standard Sampling Procedures</i>		
Porosity	7-12	7-4	General	8-10	8-4
Specific Weight	7-13	7-5	Depth Integration	8-11	8-4
Consolidation	7-14	7-5	Bed-Load Sampling	8-12	8-5
<i>Section V</i> <i>Water-Sediment Mixtures</i>			Bed Sampling	8-13	8-6
Sediment Concentration	7-15	7-7	Suspended-Sediment Sampling		
Sediment Discharge	7-16	7-7	in Lakes, Reservoirs,		
Sediment Load	7-17	7-7	and Estuaries	8-14	8-7

*

Subject	Paragraph	Page	Subject	Paragraph	Page

	Subject	Page
Figure 3-1.	Sediment discharge rating curve, Elkhorn River, Waterloo, Nebraska.....	3-5
Figure 3-2.	Flow duration curve, Elkhorn River, Waterloo, Nebraska.....	3-6
Figure 3-3.	Sediment yield relationship.....	3-12
Figure 3-4.	Sediment delivery ratios calculated for various watersheds.....	3-20
Figure 3-5.	Example of scatter in the data.....	3-20
Figure 3-6.	Effect of urbanization on sediment yield.....	3-24
Figure 3-7.	Sediment discharge adjusted for urbanization.....	3-25
Figure 4-1.	Compound cross section shape.....	4-16
Figure 4-2.	Use of boring logs in selecting design grade.....	4-17
Figure 4-3.	Effects of abrupt channel improvement.....	4-19
Figure 4-4.	Illustration of high level cut-off.....	4-20
Figure 4-5.	Specific rating curve trends over time for various discharges.....	4-23
Figure 4-6.	Measured bed profiles.....	4-27
Figure 5-1.	Incomplete concept of reservoir deposition.....	5-3

List of Figures

Figure	Page	Figure	Page
* 7-1 Relation of sieve diameter and fall diameter for naturally worn quartz particles	7-3	9-7 Brooks curve for suspended sediment concentration	9-12
7-2 Relationship of sieve diameter and fall velocity for naturally worn quartz particles falling alone in quiescent distilled water of infinite extent	7-3	9-8 Sediment discharge rating curve, Colorado River	9-13
7-3 Gradation curve	7-5	10-1 Specific gage plot	10-1
7-4 AGU gradation curve	7-6	10-2 Bed-surface gradations based on water's edge samples	10-5
8-1 Comparison of sediment load measured with pump and US P-61 samplers	8-3	10-3 Bed-surface gradations based on midbar samples	10-6
8-2 Gradation pattern on a bar	8-7	10-4 Water discharge histogram	10-7
8-3 Measured sediment-discharge data	8-10	10-5 Sediment-discharge rating curve	10-8
8-4 Mean daily water discharge and mean suspended-sediment concentration	8-12	10-6 Sediment load curves	10-10
8-5 Average annual sediment concentration ..	8-13	10-7 Variation of sediment transport with grain size	10-11
8-6 Average daily sediment concentration ..	8-14	10-8 Reconstituting the stage-discharge rating curve	10-13
8-7 Very-fine sand sediment transport	8-14	10-9 Water-surface and bed-surface profiles	10-14
9-1 Shields curve	9-2	10-10 Water-surface trend plot (specific gage plot)	10-15
9-2 Shields diagram	9-3	10-11 Numerical integration scheme	10-17
9-3 Determination of critical shear stress	9-3	10-12 TABS-2 schematic	10-19
9-4 Probability of grains to stay	9-5	10-13 Bed layering in STUDH	10-20
9-5 Bar resistance curve	9-6		*
9-6 Rouse's suspended sediment concentration distribution for $a/D = 0.5$ and several values of z	9-11
